

PROBES WARRANTY

1. They are **CONSUMABLE**, that is, they are consumed with use.
2. Its duration depends on the mode of use and the working conditions.
3. Factors to take into account:

Inclination of the installation.

Sediment blows into the water flow.

Note: installation after filter or have impurities pre-filter if installed before filter.

Addition of close chemicals, or water returns with the product when filtration is stopped.

Alkalinity, hardness, pH of the water in contact with the probe.

Work dry for one or two weeks, without contact with water. It usually happens in periods of hibernation of the pool or if the return is discharged very frequently.

Note: it must be activated by inserting the probe into the calibration liquid for 2 hours.

4. BSV Electronic S.L, as a trading company, **OFFERS A WARRANTY of 1 full year** from the date of sale, 6 months more than any manufacturer. We assume as **COMMERCIAL WARRANTY** those broken or contaminated probes that are less than one year old.
